MINISTRIES

“The following is a direct script of a teaching that is intended to be presented via video, incorporating relevant text, slides, media, and graphics to assist in illustration, thus facilitating the presentation of the material. In some places, this may cause the written material to not flow or sound rather awkward in some places. In addition, there may be grammatical errors that are often not acceptable in literary work. We encourage the viewing of the video teachings to complement the written teaching you see below.”

Pig Science

I can't recall exactly what grade it was, perhaps second or third grade, but one of my classmates, for whatever reason, in front of the whole class, happened to mention to the teacher that the Bible says we're to not eat pig. In today's easily triggered world, maybe that would cause the swat team to show up, or a swarm of students and parents to have to visit to a crisis center, but this is was the 1980's in a small rural town of 800 people. Our whole school, from K-8, was less than 200 students. Bible conversations could actually happen without the world ending.

What I recall to be a child's seemingly random response to the teacher reading Charlotte's Web, the statement itself left me a little stunned. My family follows the Bible. I follow the Bible. We go to church. We eat pig. How do I not know this?

My confusion did not last long. The teacher quickly responded. We were told that when Jesus died, he made it so we could eat pig, because today we have refrigerators to keep it safe to eat. So, we don't need to worry about that anymore.

Ahhh...that makes sense, at least according to my kid-brain. Thanks teacher, for clearing that up. Now, if I was smarter at the time, I might have asked how that worked for 1900 years of no refrigeration, but Charlotte's Web was more of my speed at the moment, and so she proceeded to read to the class. And I gave the matter little more thought.

It would be decades before I questioned the application of Leviticus 11 again in my faith.

Man is so smart that we made refrigerators, and now some of God's perfect instructions are irrelevant, or at least, I naively believed as a child. Basically, it is suggesting that man has progressed to be smarter than God. We might not think or say it, but we sure act like it at times.

Or is it that God is smarter than us, despite how smart we think we are?

Romans 1:22

[Claiming to be wise, they became fools...](#)

Proverbs 1:7

The fear of the LORD (YHWH) is the beginning of knowledge; fools despise wisdom and instruction.

Is it reasonable to suggest that the Creator of everything has our best interests in mind when He says something to the effect of “*I love you, and I want the best for you, so you are to be set apart, and thus this is what you should eat, and this is what you should not eat.*”

Is He saying that because He loves us, wants the best for us, and wants to bless us? ...or are His words found in Leviticus 11, some sort of barbaric outdated nonsense designed to limit the experiences of our taste buds?

Did YHWH say, “well, as long as you refrigerate the pig meat and then cook it really, really well, then that negates my concerns for you eating it,”?

No, He did not say that...He could have, but He didn't. Man says that, but God said no such thing. Man has now made no distinction between the unclean and the clean, because they say that God has made it ok, when God has said no such thing. On such, He has not spoken.

Ezekiel 22:26-28

Her priests have done violence to my law and have profaned my holy things. They have made no distinction between the holy and the common, **neither have they taught the difference between the unclean and the clean**, and they have disregarded my Sabbaths, so that I am profaned among them. Her princes in her midst are like wolves tearing the prey, shedding blood, destroying lives to get dishonest gain. And her prophets have smeared whitewash for them, seeing false visions and divining lies for them, saying, ‘**Thus says the Lord (YHWH) God (Elohim),’ when the Lord (YHWH) has not spoken.**

Man says it...they say there is no difference between clean and unclean, but YHWH has not spoken...Man has a talent for doing things his own way. It never worked out well in the Bible, countless times, so why should it be any different now?

We should have enough faith in YHWH to believe Him when He basically says “*Trust me, and have faith in me. There are things I created for you to eat, and things that are not good for you to eat. There is a reason for it.*”

Our Messiah placed that much faith in the Father, in following His ways. Our Messiah ate according to Leviticus 11. Maybe we should follow the ways of our Messiah?

Interestingly enough, the progress of science has not nullified YHWH's infinite wisdom in discerning for us what is and is not food, but actually validated the sound reasoning behind Leviticus 11. Pigs have not changed in 2,000 years. None of the unclean animals in Leviticus 11 have changed. Pigs are still pigs, and lobsters are still lobsters. The problems about such animals as food then, still exist today.

Most of us today know what toxins are and why they should be avoided. They are essentially poisons for our body. While our body is somewhat equipped with various tools to expunge toxins, such as our liver, kidney, lymph nodes, etc, the less exposure we have to such things, the better it often goes for us in the long run. We even know what parasites are, and we know that we have an immune system and digestive tract that helps fight off such things.

However, many fail to recognize the value of the perfect instructions in Leviticus 11. Applying Leviticus 11 as true words of the Bible actually helps us minimize toxins and parasites and maximize nutritional value. Maximizing nutrition and minimizing ingesting harmful organisms and compounds is the simplest formula to increase the likelihood of a long healthy life.

Maybe YHWH was actually telling us the truth when He said:

Proverbs 3:1-2

My son, do not forget my teaching,
but let your heart keep my commandments,
for length of days and years of life
and peace they will add to you.

Unclean animals are basically YHWH's vacuum cleaners. They were created to clean environments, and in doing so, they harbor parasites, toxins, bacteria, and viruses in excess.

So, how does that work?

Modern science has shown that pigs carry a very high toxic load making them unsafe for human consumption.

<http://science.naturalnews.com/pork.html>

Pigs are basically scavengers. They welcome eating anything they come into contact with, regardless of the source, whether it be their own feces or even their own dead carcasses.

Because of this, their bodies take in massive amounts of viruses and parasites. They are the primary carriers of many pathogenic organisms:

- Taenia solium tapeworm
- PRRS (Porcine Reproductive and Respiratory Syndrome)
- Nipah virus
- Menangle virus
- Hepatitis E virus (HEV)

Hermann JR, Brockmeier SL, Yoon K-J, Zimmerman JJ. Detection of respiratory pathogens in air samples from acutely infected pigs. Canadian Journal of Veterinary Research. 2008;72(4):367-370.

Mataragas M, Skandamis PN, Drosinos EH. Risk profiles of pork and poultry meat and risk ratings of various pathogen/product combinations. Int J Food Microbiol. 2008 Aug 15;126(1-2):1-12. PMID: 18602180

Kirkland PD, Love RJ, Philbey AW, Ross AD, Davis RJ, Hart KG. Epidemiology and control of Menangle virus in pigs. Aust Vet J. 2001 Mar;79(3):199-206. PMID: 11301749

Kasorndorkbua C, Guenette DK, Huang FF, Thomas PJ, Meng XJ, Halbur PG. Routes of transmission of swine hepatitis E virus in pigs. J Clin Microbiol. 2004 Nov;42(11):5047-52. PMID: 15528694

A Consumer Reports investigation found that an impressive 69% of all raw pork samples tested were contaminated with high amounts of volatile micoroganisms. (i.e. Yersinia enterocolitica)

<https://www.consumerreports.org/cro/magazine/2013/01/what-s-in-that-pork/index.htm>

This particular bacteria causes fever and gastrointestinal stress, and could lead even to a fatal infection.

Pigs are more toxic than clean animals for a reason.

One of the Biblical requirements for an animal to be clean is that the animal must chew the cud. These animals are called ruminants. They have four stomachs that digest and regurgitate food, employing a unique process that permits complete digestion. The major ruminants are cows, sheep, and goats.

Pigs are different. They metabolize food absurdly quickly through just one stomach, and the process only takes about four hours. A cow for example, takes twenty-four hours to digest food. That is twenty extra hours to rid the food of excess toxins during the digestive process. The more simple digestive system of a pig does not allow for this, and consequently, toxins are carried into the fat cells and organs of the pig itself.

Another problem for the pig is the lack of sweat glands. The ability to sweat is a primary mechanism that enables the elimination of toxins and waste.

Because of how pigs were designed, when we consume pig meat, we take in all of these additional microorganism and environmental toxins to a much greater quantity, well beyond than what our Creator intended.

While it might be suggested that modern farming methods and the domestication of pigs may have solved for the pig's poor eating habits, the fact of the matter is that the pig still does not have a system designed to effectively purge toxins and parasites, and even pig meat today, when tested, still reflects this. Even still, they still eat their own feces and other disgusting habits.

Many of the toxins are not neutralized at high heat. Even when high heat is utilized for cooking pork in hopes that it kills off the dangerous parasites, the high heat produces cancer-causing agents by damaging much of the essential fats.

<https://www.cancer.gov/about-cancer/causes-prevention/risk/diet/cooked-meats-fact-sheet?redirect=true>

So, in an attempt to mitigate the parasite load, most experts suggest cooking pork at high heat. But, for those who are interested in limiting the intake of cancer-causing free radicals, then high heat should be avoided. One has to choose between a great chance of parasites, or the likelihood of cancer or other chronic diseases. The alternative is to just follow the Bible, take Leviticus 11 as truth, and praise Yah that He cares for us so much that He tells us the right ways to live, ways that lead to blessings for His people.

If one examines many of the other animals defined by Leviticus 11 as unclean, two common denominators present themselves. First, they are likely cleaning up the environment, recklessly careless in what they consume. Secondly, they do not have the means to efficiently remove toxins or other disease causing biological agents.

It is interesting, in today's health-crazed world, that many blindly follow various diets and protocols, but if one suggests the Biblical diet, we are often told how tasty bacon is and how God changed his mind on what He said is good and not good to eat. Let's get back to trusting God and glorifying Him. Perhaps we will see blessings as a result?

Special Thanks to Dr. David Jockers

We pray you have been blessed by this teaching. Remember, continue to test everything. Shalom! For more on this and other teachings, please visit us at www.testeverything.net

Shalom, and may Yahweh bless you in walking in the whole Word of God.
